Notes

It was an average month with some very warm and humid spells of weather with bouts of drizzle and moderate rainfall. Cloud obscured any good views of the Perseid meteor shower on the 12th. On the 26th Ex-hurricane Bill passed over the Reserve as a depression bring a sunless day with low cloud, murky conditions and outbreaks of drizzle throughout the day!

Willow day was symptomatic of the month as a whole, blue skies in the morning and cloudy with the odd spot of rain in the evening.
